Professional Summary

Computer Science undergraduate at Graphic Era Hill University seeking a **Software Engineering Intern** opportunity for Summer 2027. Hands-on experience building software projects with C++, JavaScript, Node.js, Express.js, MySQL, HTML, and Tailwind CSS. Built an automatic timetable generation system using a Genetic Algorithm, REST APIs, MySQL, and Server-Sent Events. Strong foundation in Data Structures and Algorithms, Object-Oriented Programming, and software development.

Technical Skills

Languages: C++, JavaScript, C, HTML5, CSS3

Backend: Node.js, Express.js, REST APIs

Frontend: Tailwind CSS, Responsive Web Design

Database: MySQL

Core Concepts: Data Structures & Algorithms, Object-Oriented Programming, Genetic Algorithms

Tools: Git, GitHub, VS Code

Projects

ChronoGen – Automatic Timetable Generator — [GitHub](#) *JavaScript, Node.js, Express.js, MySQL*

- Built an automatic timetable generation system using a **Genetic Algorithm implemented from scratch** in JavaScript to generate schedules under multiple academic constraints.
- Implemented **7 hard and 8 soft constraints** using fitness evaluation, selection, crossover, mutation, elitism, and stagnation handling to optimize generated schedules.
- Developed REST APIs using **Node.js and Express.js** and integrated **MySQL** for managing courses, rooms, instructors, and generated timetables.
- Implemented **Server-Sent Events (SSE)** to stream generation progress and added timetable exports in CSV, JSON, and self-contained HTML formats.

CampusConnect – Campus Event Management Platform — [GitHub](#) — [Live Demo](#) *HTML, Tailwind CSS, JavaScript*

- Designed and developed a responsive frontend for a **campus event and club discovery platform** using HTML, Tailwind CSS, and JavaScript.
- Built reusable interface components including navigation, event cards, search and filter controls, forms, dashboards, and responsive layouts for different screen sizes.
- Implemented client-side **search, filtering, sorting, navigation, and interactive UI states** using vanilla JavaScript.
- Deployed the frontend using **Vercel** and managed the project using Git and GitHub; backend development is planned as the next phase.

Education

Graphic Era Hill University

B.Tech. in Computer Science and Engineering

2025 – 2029

CGPA: 8.3 / 10.0

Achievements

- **Top 5 Finalist – Watch The Code 2026:** Selected among the top 5 teams at the hackathon organized by Graphic Era Hill University; developed **ChronoGen** with Team Tech4ALL.

Relevant Coursework

Data Structures & Algorithms, Object-Oriented Programming, Database Fundamentals, Computer Programming
